

Suction Ball Coagulator

Laparoscopic type

Long type

Short type

Small ball type

New Hemostatic Tool

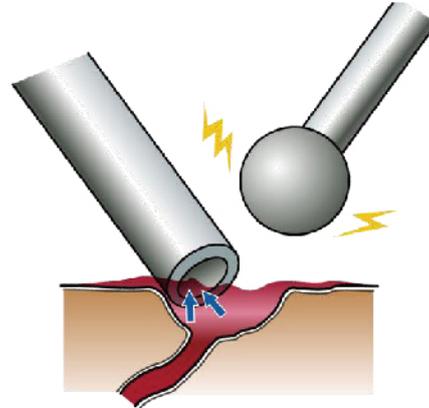

- **S**oft-coagulation + **S**uction + **B**lunt-dissection.
- Operate on suction and coagulation simultaneously.

Strong point

- Possible to hemostasis by soft-coagulation while doing a suction.
- Possible to dissect in blunt with ball tip.
- Possible to increase sucking power by blocking up a adjustment hole with a finger.
- Possible to choose from seven types according to cases.

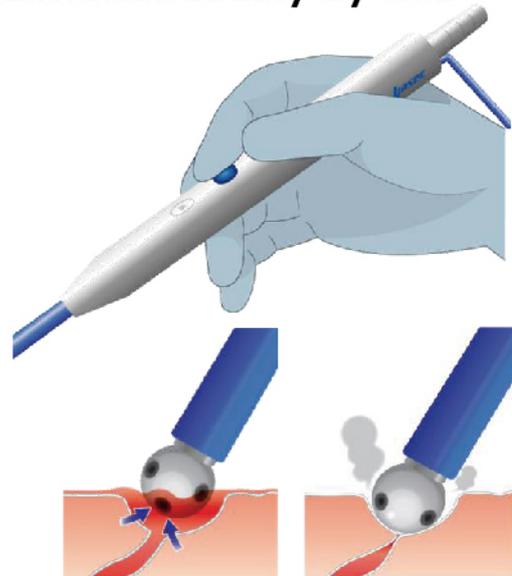

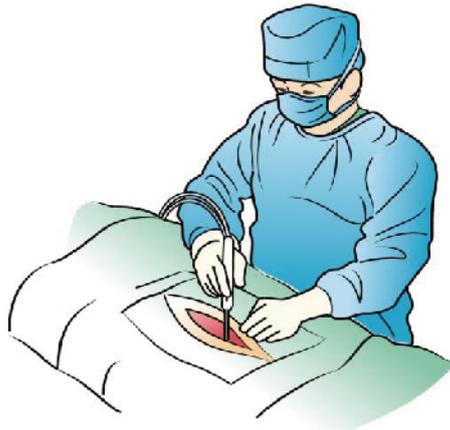

- Conventional hemostatic method -

Time consuming for hemostasis by impossible operation on simultaneous suction and coagulation.

- Novel hemostatic method -

Operate suction and coagulation simultaneously by this product.
